

ENT303TC

Team Technopreneurship Entrepreneurship and Enterprise Hub Stage 4 | Level 3

SECTION A: Basic Information

Brief Introduction to the Module

ENT303TC is a two-semester capstone module in which final-year student teams develop a technology-enabled entrepreneurial or intrapreneurial venture from validated problem to investor-ready pitch. Teams integrate market validation, technology development, business modelling, brand storytelling, teamwork and professional presentation under sustained supervision.

This module is designed to empower students to engage in collaborative problem-solving with industry schools and partners as part of their final year project. It facilitates the practical application of entrepreneurial tools and concepts. The module integrates technology, innovation, and entrepreneurship and aims to:

- 1) Provide students with a flexible opportunity to craft an original response to a multidisciplinary challenge.
- 2) Enhance students' entrepreneurial competencies by developing their presentation and pitching skills, problem-solving abilities, and soft skill.
- 3) Foster effective teamwork and collaboration among students, enabling them to work cohesively in diverse teams.
- 4) Cultivate a strong entrepreneurial identity in students by focusing on brand identity development and storytelling.

Module Leader and Contact Details

Module Leader:

Name	Email address	Office telephone number	Room number	Office hours	Preferred means of contact
Fawad Ahmed	Fawad.Ahmed@xjtlu.edu.cn	88970590	E-5075	1200-1400 Thursdays	Email

Brief Biography	Dr. Ahmed earned a PhD in Enterprise Management and completed his postdoctoral fellowship from Wuhan University of Technology (Project 211). He has been involved in launch of two successful start-ups, one as a consultant and one as an entrepreneur. He started gaining field experience early in his teenage and has over 15 years of cumulative experience in administration, finance, operational efficiency & sales functions; was recruited through a national exam for civil services as Assistant Director in the Ministry of Education (Pakistan) & served for 5 years. Prior to that, he spent 08 years in Telecom industry, managing country operations for a British SME and also provided consultancy services to another British offshore SME helping streamline the corporate outlook through improvement in Operational Efficiency, re-Branding, Client Retention and B2B process flow management with UK, Sri Lanka & Pakistan offices. He potently advocates the concept of "learning, developing self, training others and growing together" and believes it to be a life-long process. SECTION B: What You Can Expect from the Module

Educational Aims of the Module

This module is designed to empower students to engage in collaborative problem-solving with industry schools and partners as part of their final year project. It facilitates the practical application of entrepreneurial tools and concepts. The module integrates technology, innovation, and entrepreneurship and aims to:

- 1) Provide students with a flexible opportunity to craft an original response to a multidisciplinary challenge.
- 2) Enhance students' entrepreneurial competencies by developing their presentation and pitching skills, problem-solving abilities, and soft skill.
- 3) Foster effective teamwork and collaboration among students, enabling them to work cohesively in diverse teams.
- 4) Cultivate a strong entrepreneurial identity in students by focusing on brand identity development and storytelling.

Learning Outcomes

Students completing the module should be able to:

- A Confidently and persuasively present business ideas and products, showcasing their innovation and entrepreneurship concepts at a professional level.
- B Identify and address real-world business challenges.
- C work cohesively within diverse teams to achieve shared entrepreneurial goals.
- D Develop a strong brand identity for their entrepreneurial ventures and effectively communicate their brand's story.
- E Demonstrate enhanced soft skills, including effective communication, interpersonal abilities, and adaptability.

Methods of Learning and Teaching

This module is integral to contemporary entrepreneurial education within XJTLU Entrepreneur College's (XEC) Industry Schools. Rooted in Syntegrative Education, the teaching methodology is centered on supporting students in Syntegrative projects within a studio setting. The approach emphasizes hands-on practicals, seamlessly combining lectures and coaching projects, fostering project-based learning and cross-disciplinary collaboration among XEC Industry Schools and industry partners.

Functioning as a collaborative space, the module provides students with a unique opportunity to apply theoretical knowledge to real-world challenges, engaging in problem-based assessments. Industry experts actively participate, enriching students' projects and nurturing critical thinking skills crucial for innovative problem-solving in diverse industry contexts. This methodology not only cultivates an inclusive and dynamic learning environment but also equips students with holistic skills necessary for success in multifaceted industries.

Evaluation will be based on group project work, incorporating individual grading in accordance with the university's policy. This comprehensive approach aligns with our commitment to delivering a practical, well-rounded educational experience.

Syllabus & Teaching Plan

Week Number	Mode of Delivery (Lecture/Tutorial/Seminar/Field Trip/Other)	Topic	Pre-reading and others
Week 1	Practical	Syllabus Topic Student Weekly Checkpoint Project Supervisor / Mentor Checkpoint CW Link Confirm Year-3 team continuity Verify charter completeness and team continuity Submit signed Team Charter Review baseline evidence against acceleration gate Induction, Team Formation & Baseline Complete Baseline Declaration (continuing projects) Record route: Standard / Conditional / Full Acceleration A1 team evidence (Slide 6) Build initial assumption register; set up evidence hub	

W 2	Practical	Syllabus Topic Problem Re-Validation	Student Weekly Checkpoint Rewrite problem as one falsifiable statement Gather ≥ 3 secondary sources or ≥ 2 fresh user conversations Update assumption register	Project Supervisor / Mentor or Checkpoint Audit source dates and quality Confirm target user is well-defined and problem is testable	CW Link A1 Slide 2	
W 3	Practical	Syllabus Topic Market & Competitor Analysis	Student Weekly Checkpoint Build TAM/SAM/SOM workbook with sourced assumptions Profile ≥ 3 competitors/substitutes Draft USP hypothesis	Project Supervisor / Mentor or Checkpoint Recalculate one market figure Challenge reachable-market and switching assumptions Confirm sizing method accepted	CW Link A1 Slides 2–3	
W 4	Practical	Syllabus Topic Research Design & Evidence Planning	Student Weekly Checkpoint Define research question(s) linked to assumption register Prepare instruments; set consent/data plan Pilot instrument where feasible	Project Supervisor / Mentor or Checkpoint Check methods answer the stated questions Flag leading questions, biases or ethics issues Approve plan, with or without conditions	CW Link A1 evidence base	
W 5	Practical	Syllabus Topic Primary Data Collection	Student Weekly Checkpoint Complete 3–5 user interactions/tests Store raw evidence with anonymised IDs Write cautious interim pattern summary	Project Supervisor / Mentor or Checkpoint Spot-check 2 evidence items Confirm freshness, relevance and balance Approve sufficiency for synthesis or request more	CW Link A1 Slides 2–3	
W 6	Practical	Syllabus Topic Insight Synthesis & Direction Decision	Student Weekly Checkpoint Cluster evidence into ≥ 3 insights Update persona/journey map Revise problem statement; record pivot/persevere decision	Project Supervisor / Mentor or Checkpoint Trace one insight to raw evidence Challenge descriptive-vs-analytical framing Confirm decision is evidence-led	CW Link A1 Slides 2–4	

W7	Practical	Syllabus Topic	Student Weekly Checkpoint	Project Supervisor / Mentor or Checkpoint	CW Link	
		Ideation, Option Comparison & Storyboard	Develop ≥ 3 materially different concepts Complete weighted comparison matrix Build six-slide deck storyboard	Check concepts are genuinely distinct Challenge criteria weighting Confirm evidence still required for final selection	A1 Slides 3–4	
W8	Practical	Syllabus Topic	Student Weekly Checkpoint	Project Supervisor / Mentor or Checkpoint	CW Link	
		Business Model & ASSESSMENT 1 SUBMISSION	Finalise value proposition and 9-block BMC Complete claim-evidence map Submit final 6-slide deck via LMO by Fri 6 Nov 2026, 23:59	Stress-test BMC coherence Confirm compliance: exactly 6 slides, no appendix Verify both submission receipts after deadline	ASSESSMENT 1 DUE (20%)	
W9	Practical	Syllabus Topic	Student Weekly Checkpoint	Project Supervisor / Mentor or Checkpoint	CW Link	
		Post-Submission Validation	Test lo-fi prototype/service mock-up with ≥ 3 users Log iteration Self-audit against A1 feedback when released	Review test evidence and iteration log Confirm readiness to move into Assessment 2 build phase	Feeds A2 traction	
W10	Practical	Syllabus Topic	Student Weekly Checkpoint	Project Supervisor / Mentor or Checkpoint	CW Link	
		Semester 1 Evidence Close-Out	Archive Semester 1 evidence (deck, receipts, evidence map) Draft Assessment 2 roadmap and Week 11–14 build targets	Confirm archive completeness Sign off Semester 1 checkpoint record Agree Week 11–14 build targets	Bridges A1 $\rightarrow$ A2 / A4 base	

Assessment Details

Initial Assessment

Group Project (100% of the module mark)

Assessment Type: CW

Learning outcomes assessed: A, B, C, D, E

Duration: N/A

Resit opportunity: S

Assessment Task	Learning Outcomes	Weighting	Release Date	Due Date
Group Project	A, B, C, D, E	100%	04/Sep/2026	/

Artificial Intelligence Permissions	Yes, Permitted under the conditions applicable per the University AI-use policy and integrity policy			
Brief Description of the Assessment Task				
Component	Mode	Weight	Deadline	LOs
Assessment 1: 6-Page Pitch Deck	Group	20%	Friday, 6 November 2026 (Semester 1, Week 8)	A, B, C, D
Assessment 2: 3-6 Minute Pitch Video	Group	20%	Friday, 18 December 2026 (Semester 1, Week 14)	A, B, C, D, E
Assessment 3: Final Pitch Deck (10-12 slides) and Live Presentation	Group	30%	Sunday, 21 March 2027, 11:59 pm Beijing time. Live presentation: 22-26 March 2027	A, C, D, E
Component	Mode	Weight	Deadline	LOs
Assessment 4: Individual Reflection Report	Individual	30%	Friday, 16 April 2027 (Semester 2, Week 8)	A, C, E
Notes:				
- All assessments must be submitted through the approved academic portal by the stated deadlines, regardless of Dream Chaser progression. - Assessments 1-3 are submitted once per team. Assessment 4 is submitted independently by each student. - Every team member must be able to explain and defend the evidence, assumptions, calculations and decisions underpinning group submissions. - Students must retain contribution records, version histories, evidence registers and approved AI-use declarations. - The separate assessment brief takes precedence where requirements are updated or clarified.				

Resit Assessment

Coursework (100% of the module mark)

SECTION C: Additional Information

This section provides students with essential information and resources pertaining to their academic studies to ensure a successful academic journey and engagement with the module.

Student Feedback:

The University is committed to receiving and responding to student feedback in order to improve the quality of the student experience within the institution. It is University policy that the preferred way of doing this is by using the Online Student Module Feedback Questionnaire Survey. Students are encouraged to complete the questionnaire survey for this module at the end of the semester.

Attendance:

The University expects students to attend all timetabled learning sessions associated with this module, and to engage with the relevant learning and support resources. Student attendance will be recorded using the Attendance Management System (AMS). Please follow your teacher's instructions for recording your attendance at each session. Students are responsible for managing their attendance, and should take prompt action to inform the Module Leader in case circumstances beyond their control affect their class attendance. You are advised to read the University's 'Student Attendance Policy' for more information.

Rules of Submission for Assessed Coursework:

The University has detailed rules and procedures governing the submission of assessed coursework. You need to be familiar with the rules and procedures as detailed in the University's 'Code of Practice on Assessment'.

Late Submission of Assessed Coursework:

The University attaches penalties to the late submission of assessed coursework. You need to be familiar with the rules as detailed in the University's 'Code of Practice on Assessment'.

Mitigating Circumstances:

Students who are unable to submit coursework by the deadline or attend examinations due to serious illness or other unforeseen circumstances, as defined in the Mitigating Circumstances (MC) Policy, may submit a Mitigating Circumstances Application. The application should be submitted before the assessment deadline (or examination date) under the Academic Records page on e-Bridge. Misuse of the MC policy will result in disciplinary actions and demerit points.

Academic Integrity:

Any violation of academic integrity including plagiarism, collusion, copying, submission of commissioned or procured work, Academic Offences Involving Artificial Intelligence (AI), and/or falsification and fabrication of data will result in penalties and demerit points. Please be familiar with the

University's Academic Integrity Policy.

Examination Misconduct:

The University also values academic integrity in the conduct of examinations. Any behavior that violates examination regulations will not be tolerated and will result in penalties.

Artificial Intelligence (AI):

Information on whether the use of AI is permitted or not for each assessed coursework is indicated in the Assessment Details section of this module handbook.

For detailed guidelines, please refer to the Academic Integrity Policy Guide for Students and Staff.

For more information and resources on Artificial Intelligence and your learning and assessment, please consult the XJTLU AI for Learning pages of the Learning Mall Core.

Learning Mall Core:

Copies of lecture notes and other materials are available electronically through the Learning Mall Core, the University's virtual learning environment, at learningmall@xjtlu.edu.cn.

Communication:

All official communication concerning module-related matters will be conducted via e-mail and/or as Learning Mall Core announcements. Other modes of electronic communication are treated as informal.

Further Support:

You are advised to contact your Module Leader in the first instance if you experience any issues with your learning on this module. You may also contact your Academic Advisor or Programme Director. Further information on the kinds of support that the University provides to students can be found in the XJTLU Student Handbook.

You are strongly advised to read the policies mentioned above very carefully, because this will help you perform better in your academic studies. You can find all the policies and regulations related to your academic study on the e-Bridge → 'Document Zone' page.
