20 October 2026

Problem & Market Opportunity

Team-reported interviews: n = 15, qualitative input

Need or constraint	Evidence IDs	Design implication
Occasional needs	V002/005/008/015	Planned requests first
Owner commitment	V001/003/009/012	Dates + acceptance
Privacy and choice	V001/004/005/013	Optional GPS / import

First target customer

A DTS student with a planned item need,
without a suitable item from a known peer.

TAM context (XEC)

4,000+

May 2026 report.
Population, not demand.

Pilot SAM boundary

~430

Eight DTS classes.
Team estimate.

Four-week SOM planning case

80 × 10% posting × 25% completion = 2. Supply cap: 4 owners × 2 fulfilments = 8.

Xianyu	Renrenzu	ATRenew
Resale listings	Equipment rental	AHS trade-in / Paipai resale

All pilot stages are assumptions. Recruitment permission and actual demand remain unconfirmed. S1-S4.

Solution & Value Proposition

Dated request and offer

Return confirmation

01 Need and dates

Publish dates and budget. Expire old requests.

02 Relevant owner offer

An offer is a suggestion, not an automatic booking.

03 Compatible handoff

Review personal classes or enter times manually.

04 Explicit agreement

Owner accepts. Both parties confirm handoff and return.

Differentiation to test

Date-aware coordination with public handoff and optional disclosure.
Measure whether it helps a real local task beyond friends and existing services.

Technology & Innovation

01
Local import
PDF.js and OCR
Image / PDF input

02
Human review
Classes, dates,
weeks and rooms

03
Constraint filter
Availability, calendars
and existing bookings

04
Ranked options
Up to four options
Public handoff points

05
Confirmation
Owner acceptance
Bilateral records

Implemented rule	Why it matters
14 days, 15-minute candidates	Search a bounded, inspectable time window
Teaching weeks and exceptions	Different courses, years and personal terms
Availability and conflict checks	Avoid class, booking and return conflicts
Private timetable access	Keep full schedules private

Payments remain offline. No platform escrow, insurance or public-launch certification.

Value enabled

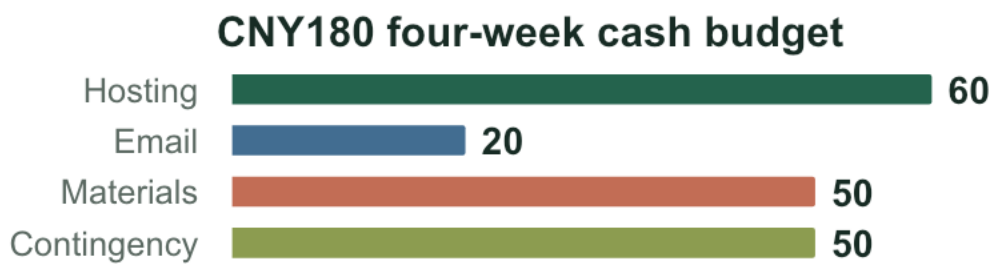

A compatible item/date and a meeting both people can review. No single timetable template for every student.

Limits

OCR can fail. Suggestions use heuristics, not predictive AI. Manual times remain available.

Business Model

Partners (proposed)	Activities	Value proposition	Relationships	Segments
Class contacts Student societies Hosting and email	Moderation Maintenance Pilot support	An item for your dates Clear fees and return Public handoff Optional location	Manual support Explicit confirmation	Occasional requesters Willing item owners DTS pilot first
	Resources Relevant supply Code and operators		**Channels** Eight DTS classes Permitted referrals	
Costs CNY180 cash for four weeks. Team time separate.			**Revenue** Pilot fee CNY0. Later fee requires validation.	

CNY20
Planned paid GMV

-CNY180
Pilot cash result

CNY0
Pilot fee revenue

CNY1
Later 5% fee, before costs

Plan: validate demand, supply and cost before expansion. Team time is separate. Deposits are not revenue.

Team

Member	Responsibility / capability area	Assigned output
郭宇璇 (Rita)	Software delivery and coordination	Code, acceptance scope, release approval
汪睿	Analysis and presentation	BMC, financial model and pitch narrative
毛相宜	Interviews and requirements	Consented records and traceable insights
黄俊杰	Recruitment and personas	Sampling rationale, persona and access
李元龙	User testing and statistics	Task outcomes, denominators and checks
黄禹轩	Data handling and weekly submission	Evidence register, files and receipts
汤鋆秋	Iteration and retesting	Decision log, prioritisation and retests

W6 / 19–25 OCT

Three insights, persona and journey.
Link raw records and consent.

W7 / 26 OCT–1 NOV

Review concepts and member skills.
Confirm the six-slide argument.

W8 / 2–6 NOV

Check BMC and AI declaration.
Submit A1 through both routes.

Capability areas follow agreed roles, not verified credentials. Member backgrounds and contribution evidence need confirmation.
